

Intervention of **Mr. Mohamed Gahche**
Deputy for Zone 6: America Asia and Oceania

On Bill on
Vocational Training

November 05, 2007

In the Name of Allah the Almighty and Merciful

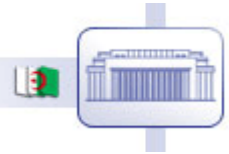

- Mr. Speaker of the National People's Assembly
- Your Excellencies Ministers
- Colleagues and Fellow MPs
- Medias
- Honorable Audience

Might peace and Allah's mercy and blessings be upon you

The vocational training is an important sector in the ruling of the train of development in a country where the inhabitants are suffering from a high percentage of unemployment.

When will we reduce to import simple labor, and we have a high percentage of youth and labor, if this category respects **04 conditions**, it will become a good production power, these are:

1- Training 2- Motivation 3- Respect 4- Decent Wages

1- Training:

The vocational training of the citizen based on advanced scientific specialists and experts in the field which makes the product competent, which will be relied on in the construction of the country.

2- Encouragement and Motivation:

Training the citizen in vocational training and encouraging him to work and create would make him an active and effective element, and this can be achieved only through framing and follow-up at all stages of training.

3- Respect:

Giving every citizen all due respect for his work, no matter how modest they might be; the simple actions, especially in the field of construction, are the backbone of the economy of any state (infrastructure economy).

4- Decent wages:

Decent wages for simple jobs, the citizens may be pushed to pay more attention to and master them.

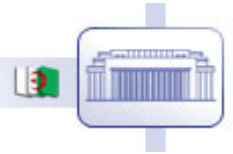

Mr. Speaker

Involving vocational training in the private and government institutions, this by sending trainees immediately after their training towards institutions, whether governmental or private, and for the apprenticeship and application.

The necessity to send students to the private sector for a period of time lasting from 03 to 06 months, the government and the private sector share during the apprenticeship period their symbolic salary.

Mr. Speaker

The inclusion of foreign languages at the various stages and specialties of vocational training and not as supplementary matters to understand words only, if we want our young people to be able to participate effectively in the economic and professional life, it is obvious that the training is accomplished according to modern techniques and tools used on the spot, because the technology is evolving constantly.

Mr. Speaker

The psychological factor plays a significant role in any enterprise of any kind, and the existence of the citizen in this institution came often after school failure, which makes him a sensitive individual not concentrated on this type of training, therefore, the vocational training centers must be provided with sworn specialists in psychology and sociology in order to be alone with the students and follow up with their problems in their private life, school life and field training.

At last, I thank the Ministry of Education and Vocational Trainings and other ministries which participate in the improvement and development of these educational institutions to be promoted to the global level.

Might peace and Allah's mercy and blessings be upon you.

Thank you.
